

YEAR OF LIVING DANGEROUSLY

A Product Manager's Guide to Surviving the Transition to Agile Development

Silicon Valley Product Management Association

July 2nd - 2008

Rasmus **Mencke**

History

8

Age of Salesforce in years

from the beginning

3

Number of people in R&D

smart

fast

innovative

4

Number of Major Releases per year

7 years later

rapid success

41,000+

Customers

1,000,000+

Subscribers

150 Million

transactions per day

200+

people in R&D

it was getting more difficult to deliver

1

Number of Major Releases in 2006

Yep, that's it.
(just one release all year)

Why?

Lack of visibility at all stages in the release

Late feedback on features at the end of our
release cycle

Fixed feature sets

Long and unpredictable release
schedules

Gradual productivity declined as
the team grew

**What did we do
about it?**

Major enterprise-wide Agile Transformation to ADM

in just 3 months

+

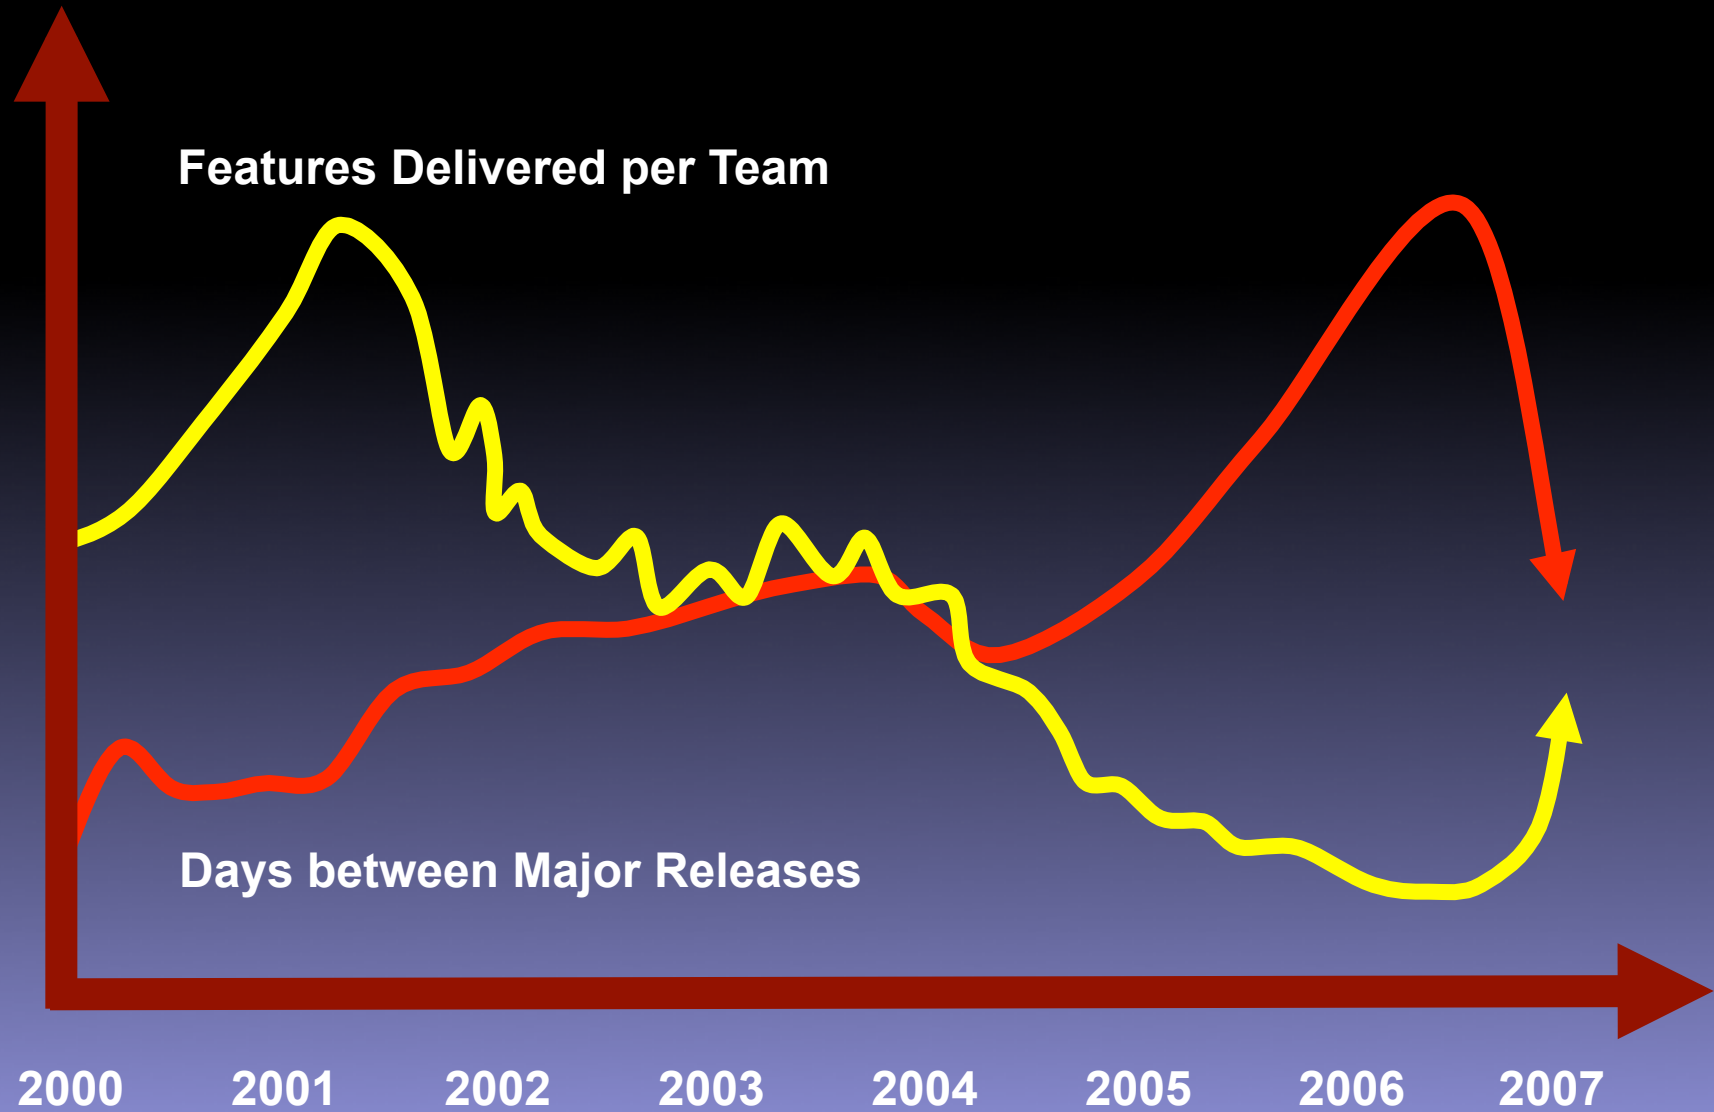

**another 18 months of
continuous improvement**

“ I knew we needed radical change to get us back on track to regular releases and agile delivered. ”

Parker Harris
Founder and Executive Vice President, Technology
Salesforce.com

Transformation Results

Agile Transformation Timeline

Customers

Our customers are happy...

**“ADM has delivered total visibility, total transparency
and unbelievable productivity... a complete win!”**

Steve Fisher
Sr. Vice President, Platform Division
Salesforce.com

On time
delivery?

Last waterfall release

154

152

150

148

146

144

No really.
Every agile release has been deployed on-time
(down to the exact minute)

“ Since implementing our iterative development methodology which enables us to deliver more frequent releases, we have seen statistically significant improvements in our satisfactions scores across our service attributes from our features to our platform. ”

Wendy Close
Salesforce Customer Satisfaction Survey
Sr. Manager Product Marketing
Salesforce.com

(Source: Salesforce.com Relationship survey, conducted by independent third party CustomerSat Inc., July 07 and Feb. 08. Sample size equals 4000+ randomly selected worldwide respondents from all size companies and industry sectors.)

94%

% of customers that indicate they definitely or probably will recommend [salesforce.com](https://www.salesforce.com) to others

** Source: Salesforce.com Relationship survey*

+61%
improvement in “mean time to release”
for major releases in 2007

+94%
Increase in feature requests delivered -
2007 v. 2006

+38%
**Increase in feature requests delivered per
developer - 2007 v. 2006**

Cumulative Value (features) delivered in Major Releases

+568%

Our teams are happier...

“Simple is better. With our agile approach to product development we've put our amazing people in charge. They work as a team to do the right thing for the customers, their fellow employees and our shareholders.”

Todd McKinnon
Sr. Vice President, Research & Development
Salesforce.com

92%
of respondents believe ADM is an effective
approach for their scrum teams

91%

**of respondents believe the quality of our products
have improved or stayed the same**

**** 59% say our quality has improved***

86%

of respondents are having the “best time” or a
“good time” at Salesforce

** Improved from 40% 15 months ago*

92%

**of respondents would recommend ADM to their
colleagues inside or outside Salesforce**

How'd we do it?

**Launched organizational
change program**

Created a dedicated, cross-functional rollout team

Everyone jumped in together

**Positioned as a return to our
core values**

KISS

**Listen to your
customers**

Iterate

Distributed Ken Schwaber's Agile book

Developed 2-hour Agile overview – now

New to Salesforce?
Welcome! Now get busy. Your teams are moving.

12 Hot Tips to Get Your Scrum Team Started! *New!*
Wanna adopt ADM for your team? Check out these [simple 12 hot tips of things to do before getting your team started](#) that will make sure they get off on the right foot to success!

Created internal, wiki-based website as a reference for team members

Just get started.

(the rest will come later)

Change isn't easy.

(get ready to be hated)

“Scrum doesn't account for the fact of the reality of the waterfall. You cannot deny this by superimposing scrum over it.”

“Management is not proactive as we wait for decisions from management. Scrum gives me the feeling that Big Brother is watching and monitoring everything we do...”

“It seems like we spend more time talking about scrum...than we spend time talking and working on [salesforce.com](https://www.salesforce.com).”

“In many ways, scrum seems like an inflexible, bureaucratic process akin to something at the Department of Motor Vehicles.”

“...ditch the stupid annoyingly dumb excel spreadsheet.”

They don't like us.

(and may never like us again)

Team is effective but
productivity is lower

“Stop trying to implement scrum, and look
at how many releases we can really do
in a year.”

Lack of innovation. No innovation. I can't innovate. I am at the
mercy of my product owner, who cares not for innovation, only
the chirpings of customers...

“We've managed to take a lightweight process
and attach enough ... to it to make it just as bad
as our previous process, good job!”

“Scrum does not meaningfully affect the team's
effectiveness; it is structure and process that often
distracts the team from their goal, and can be used to
micromanage the team.”

“The lingo is ridiculous”

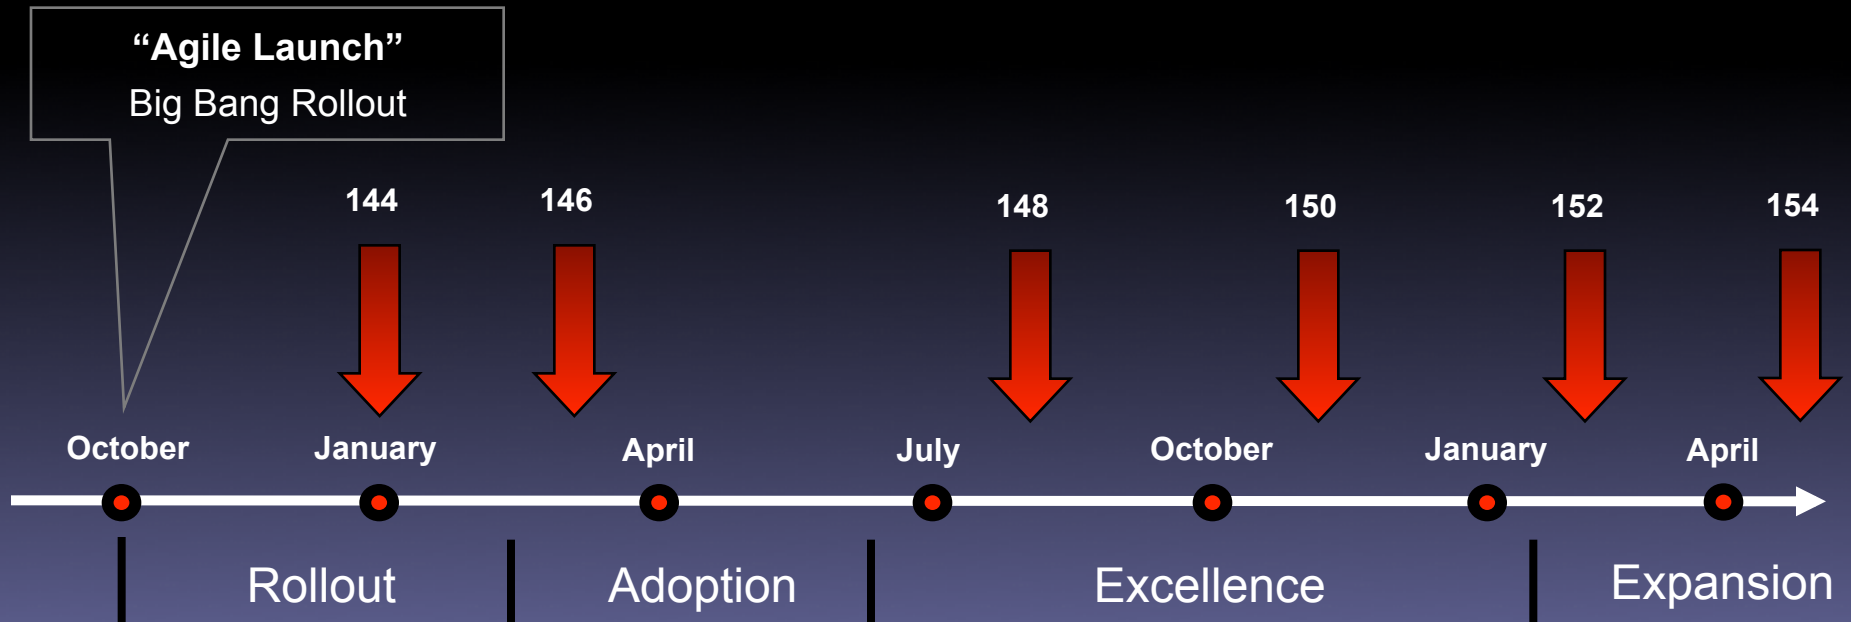

But, they got over it.

And. Finally. The rollout is over!

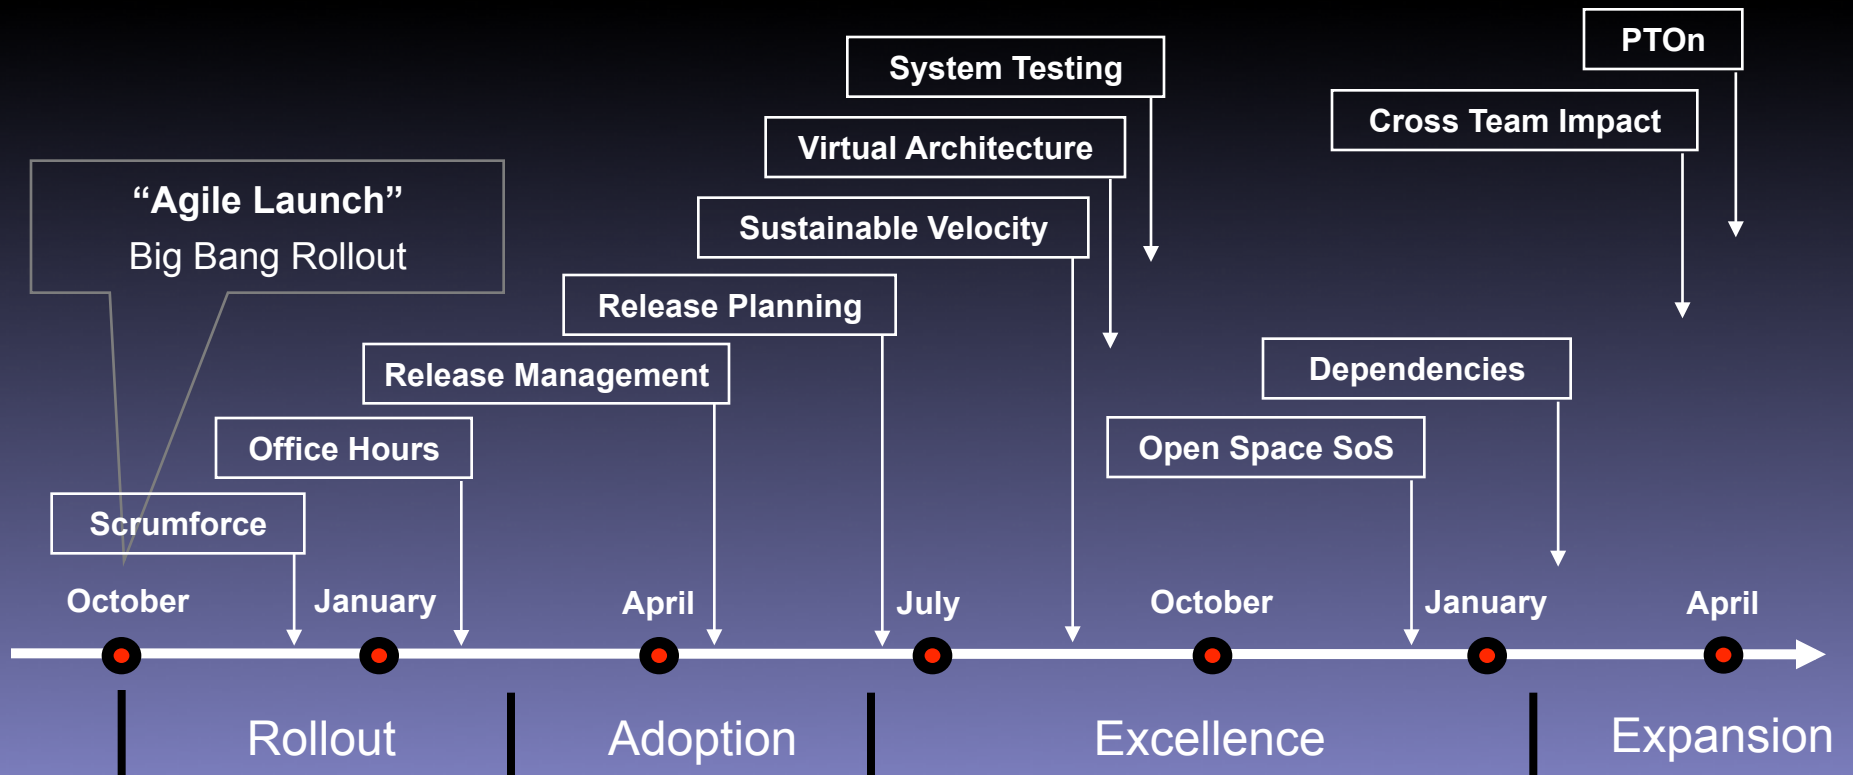

(but we're not done)

Now for the later stuff.

Continuous Improvement

Continuous Improvement

Don't be like us.
(or what would we'd do differently)

950 **Ability to define WorkFlow on Secondary Objects**
Admin Tools: idea ID: 74061 | [Edit idea](#) | [Merge idea](#) | [Delete idea](#)
We need to be able to define workflow rules against secondary objects, such as Case Comments, Notes, Attachments etc.
This is critical to being able to deliver a complete Case/Opportunity/Account management process.

3530 **Workflow From Case Comments**
Admin Tools: idea ID: 10090028 | [Edit idea](#) | [Merge idea](#) | [Delete idea](#)
Workflow From Case Comments would allow a workflow rule to be set on the Case Comment object. Corresponding actions could be created on either the Case Comment itself or on the parent Case. This would enable such actions as:
- Changing the case status when a new comment is added from the Self-Service portal
- Stamping the last comment time or text directly on the case for reporting purposes
- Flipping comments from public to non-public if certain stop-words are found in it
- Notifying someone associated with the case when certain new comments are added.
