Who are you?

Do you have users?

Moms!

There's a reason for this...

Good News
Bad News

Personas

Empathy Maps

Jobs to be Done

Journey Maps

Facts

Problems

Behaviors

**Needs &
Goals**

Moms!
But, you know, not just moms...

??????

??????

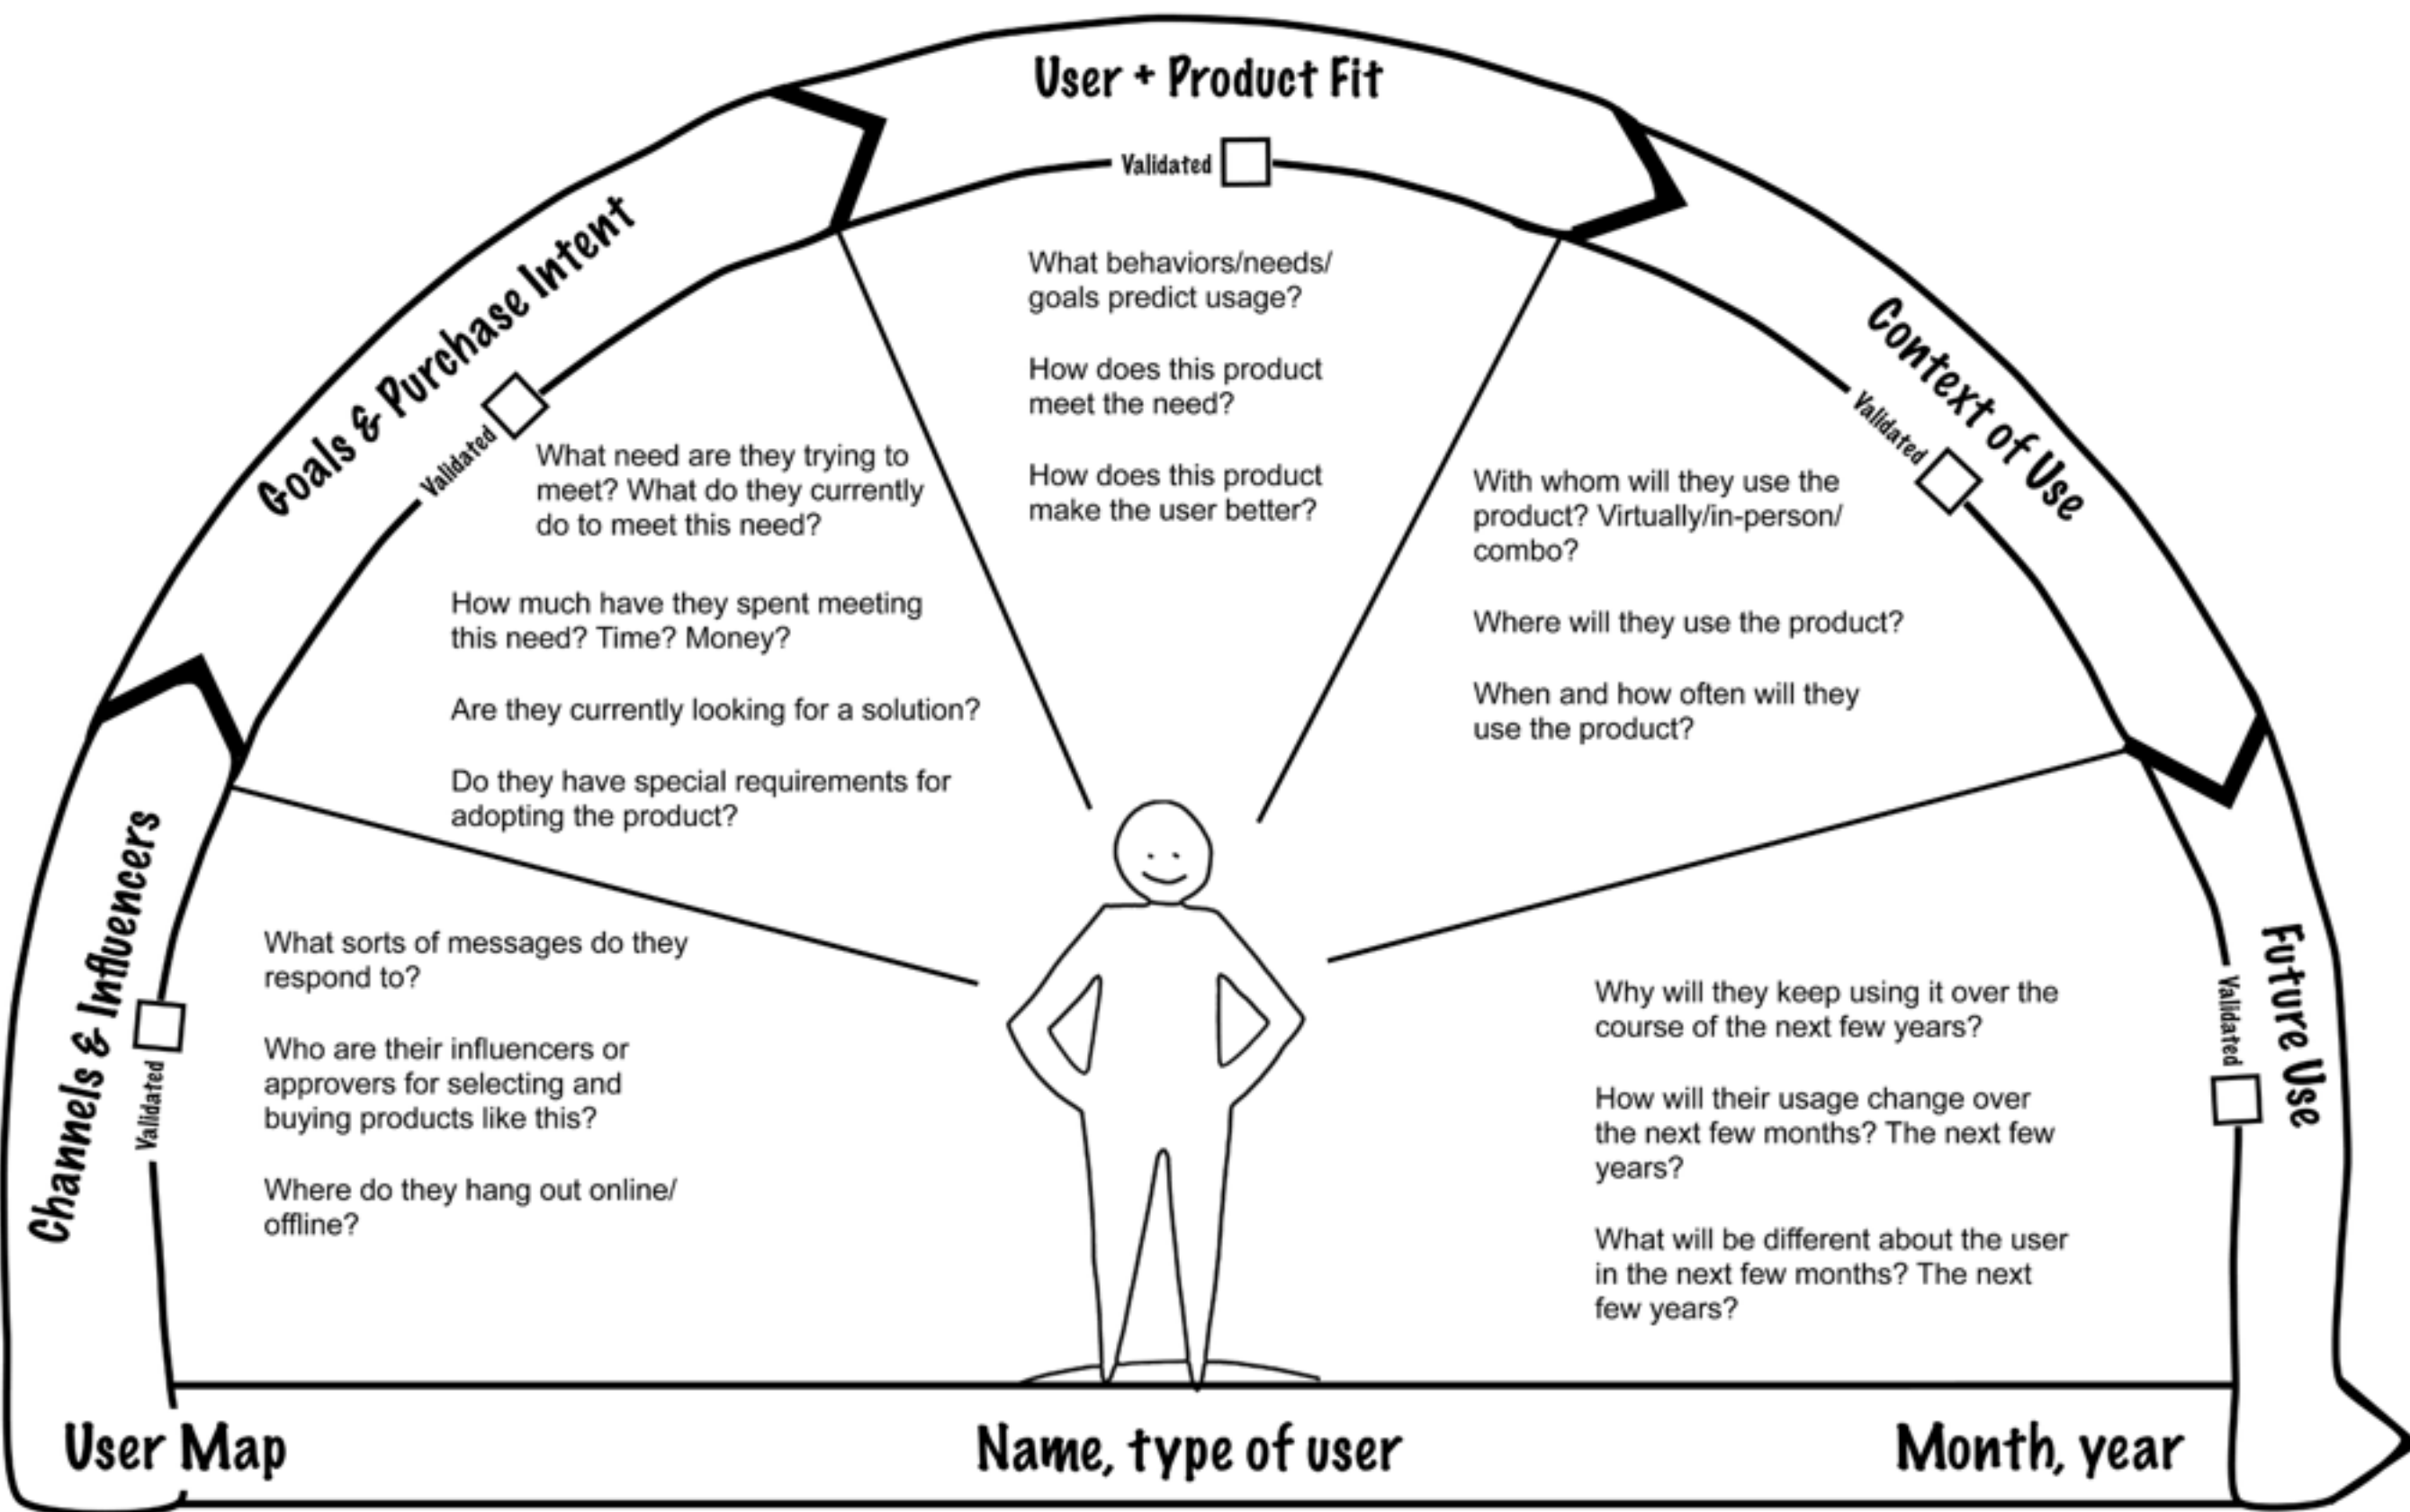

The Past

The Future

It's not the fault of the tools!

Or is it?

Channels & Influencers:

Goals & Purchase Intent:

User + Product Fit:

Context of Use:

Future Use:

Channels & Influencers: How will you attract potential users?

Goals & Purchase Intent: How do you know someone will be a user?

User + Product Fit: How do you know your product fills a need?

Context of Use: How will your user interact with your product?

Future Use: How will your user grow and change?

Channels & Influencers

“Where does your user learn about products like this?”

“What sorts of messages do they respond to?”

“Who are their influencers or approvers for selecting and buying products like this?”

**Understanding the decision making &
buying process can help with
messaging, positioning, and even
user research!**

Goals & Purchase Intent

What need are they trying to meet?

What do they currently do to meet this need?

How much time do they spend meeting this need?

How much money have they spent meeting this need?

Are they currently looking for a solution to meet this need?

Do they have any special requirements or needs for adopting this product?

Understanding user intent can help you know how much convincing and onboarding will be required in early user interactions.

Understanding user intent can help you know how much convincing and onboarding will be required in early user interactions.

Determining User + Product Fit

What behaviors/needs/goals predict usage?

How does this product meet the need?

How does this product make the user better?

Understanding needs will help you predict which features are most important for specific users.

Understanding needs will help you predict which features are most important for specific users.

Context Of Use

**With whom will they use the product?
Virtually/in-person/combo?**

Where will they use the product?

**When and how often will they use the
product?**

Understanding how people use your product helps you determine the platform and design requirements. It can also help you protect your user by keeping their information safe.

Future Use

Why will they keep using it over the course of the next few years?

How will their usage change over the next few months? The next few years?

What will be different about the user in the next few months? The next few years?

Understanding future usage helps you improve user retention by giving users an incentive to continue using your product after the first few weeks.

Understanding future usage helps you improve user retention by giving users an incentive to continue using your product after the first few weeks.

Moms!
(who are also digital marketers)

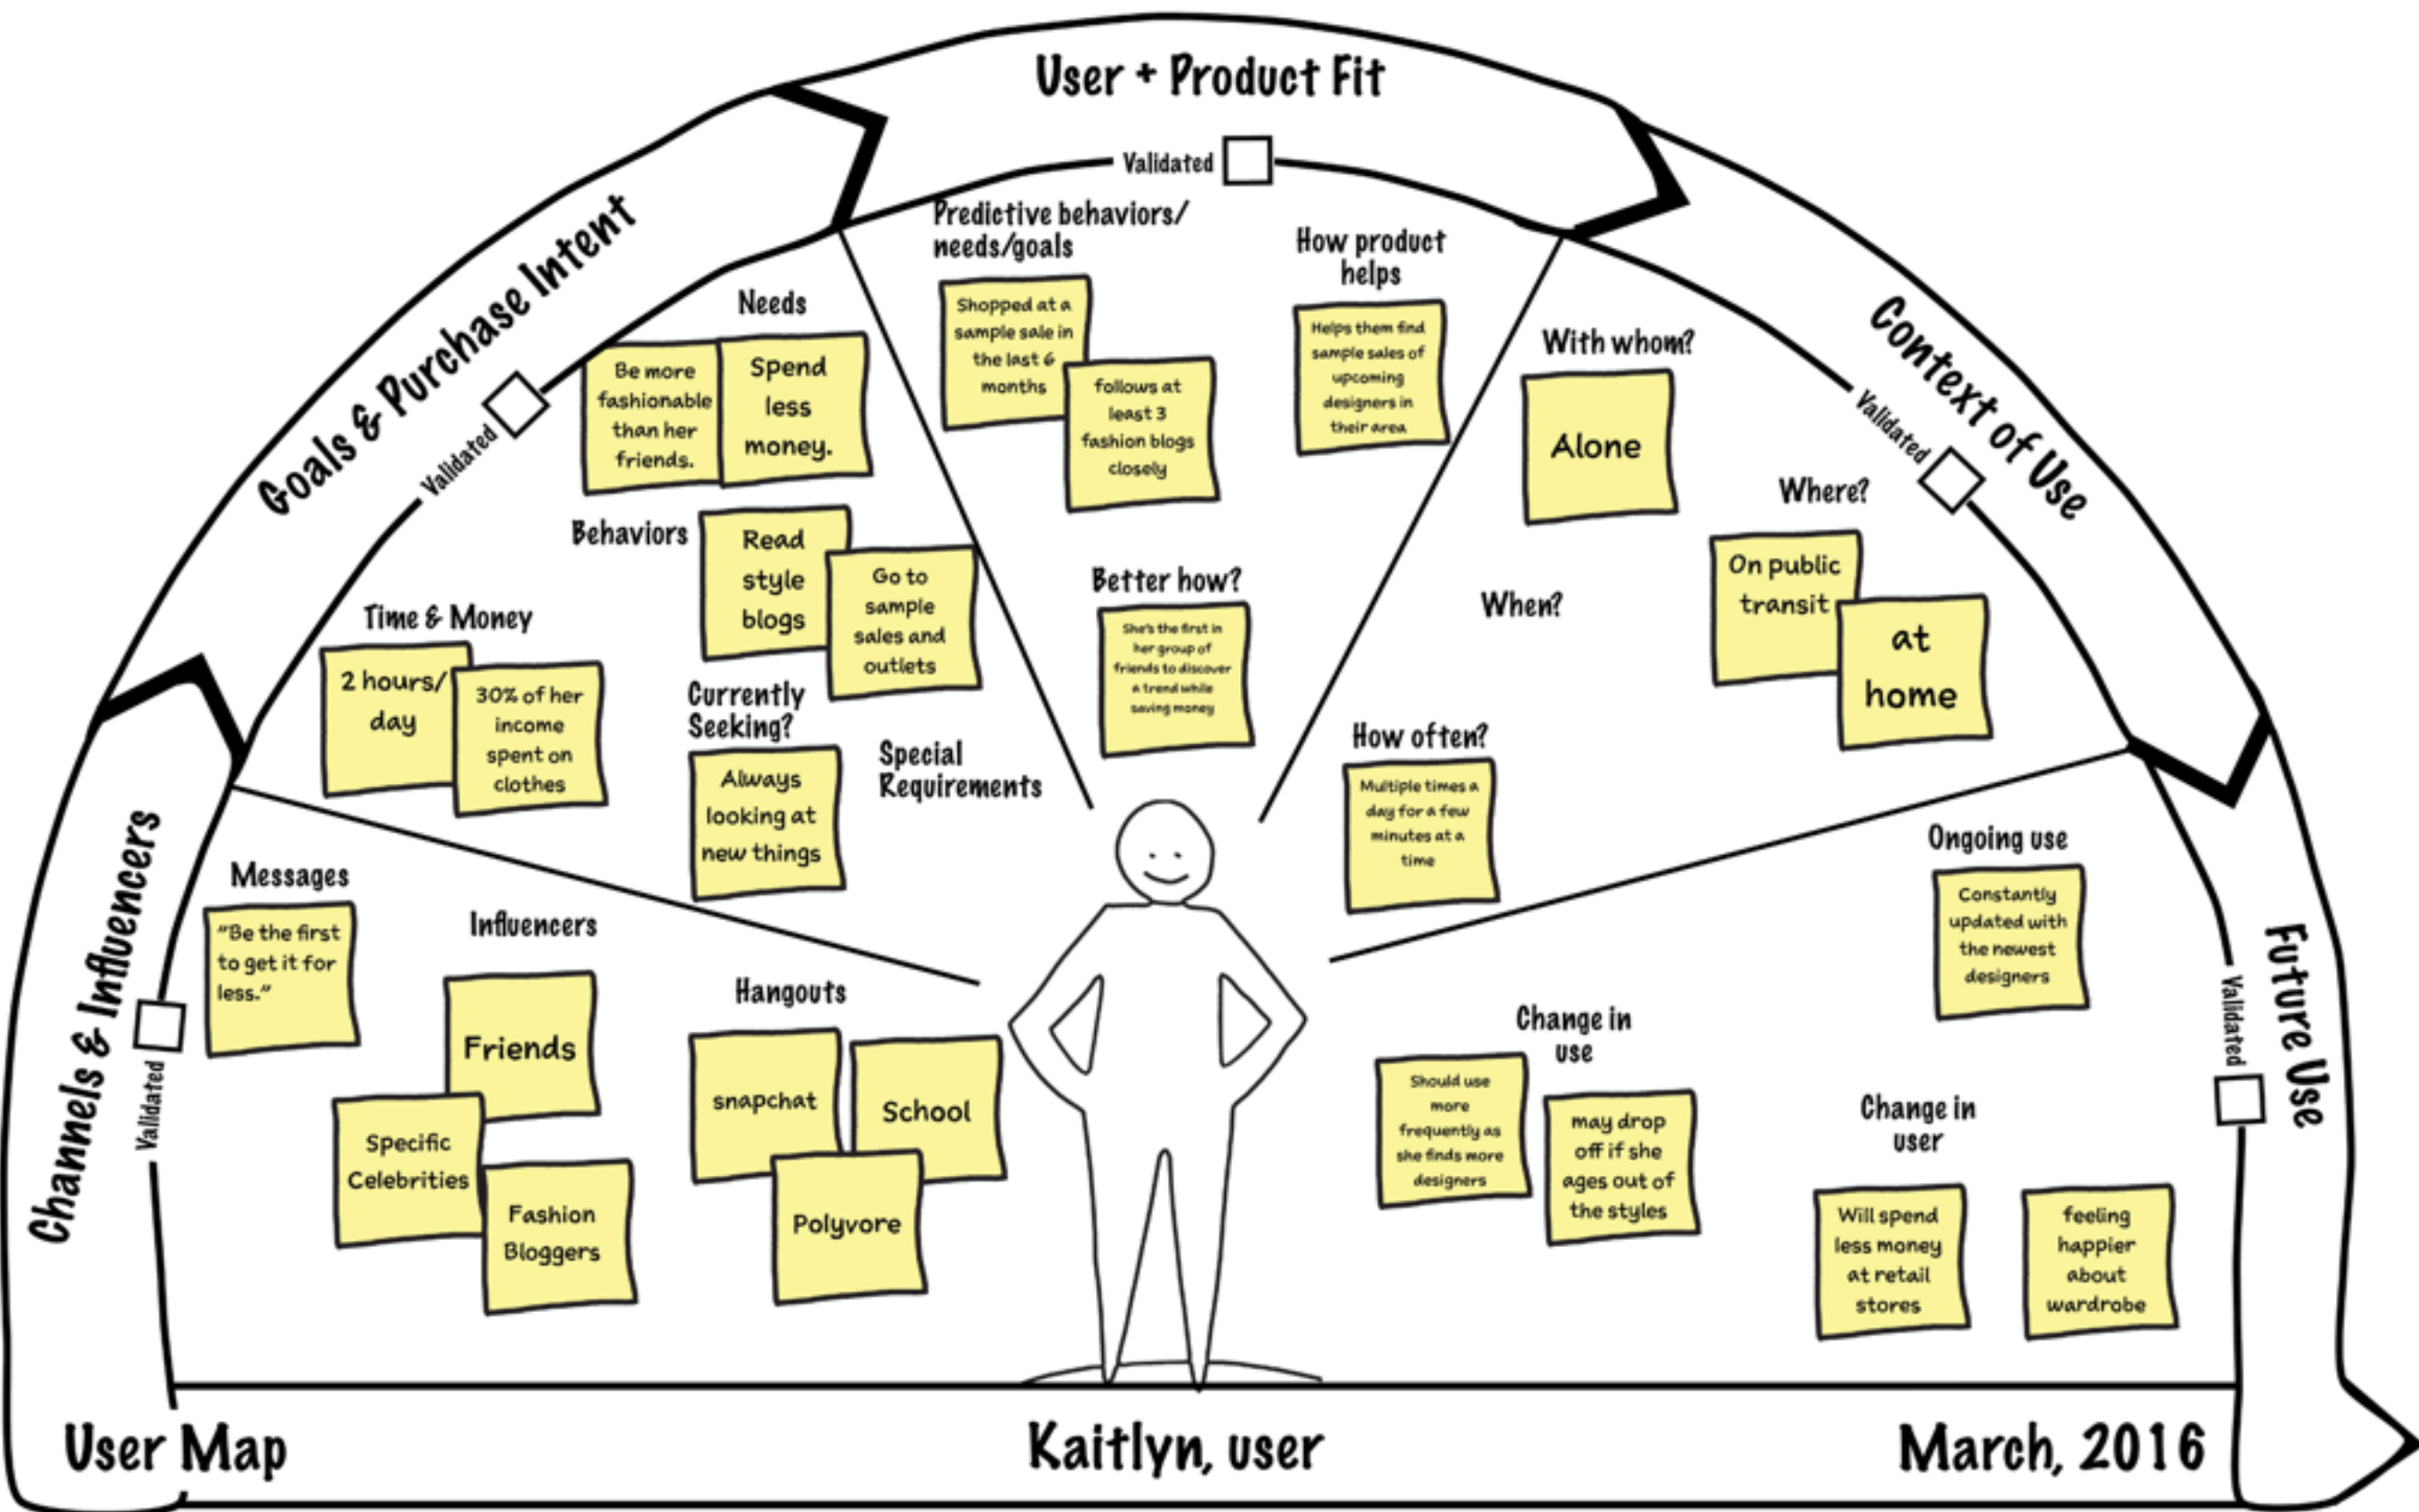

How many of you know all the answers?

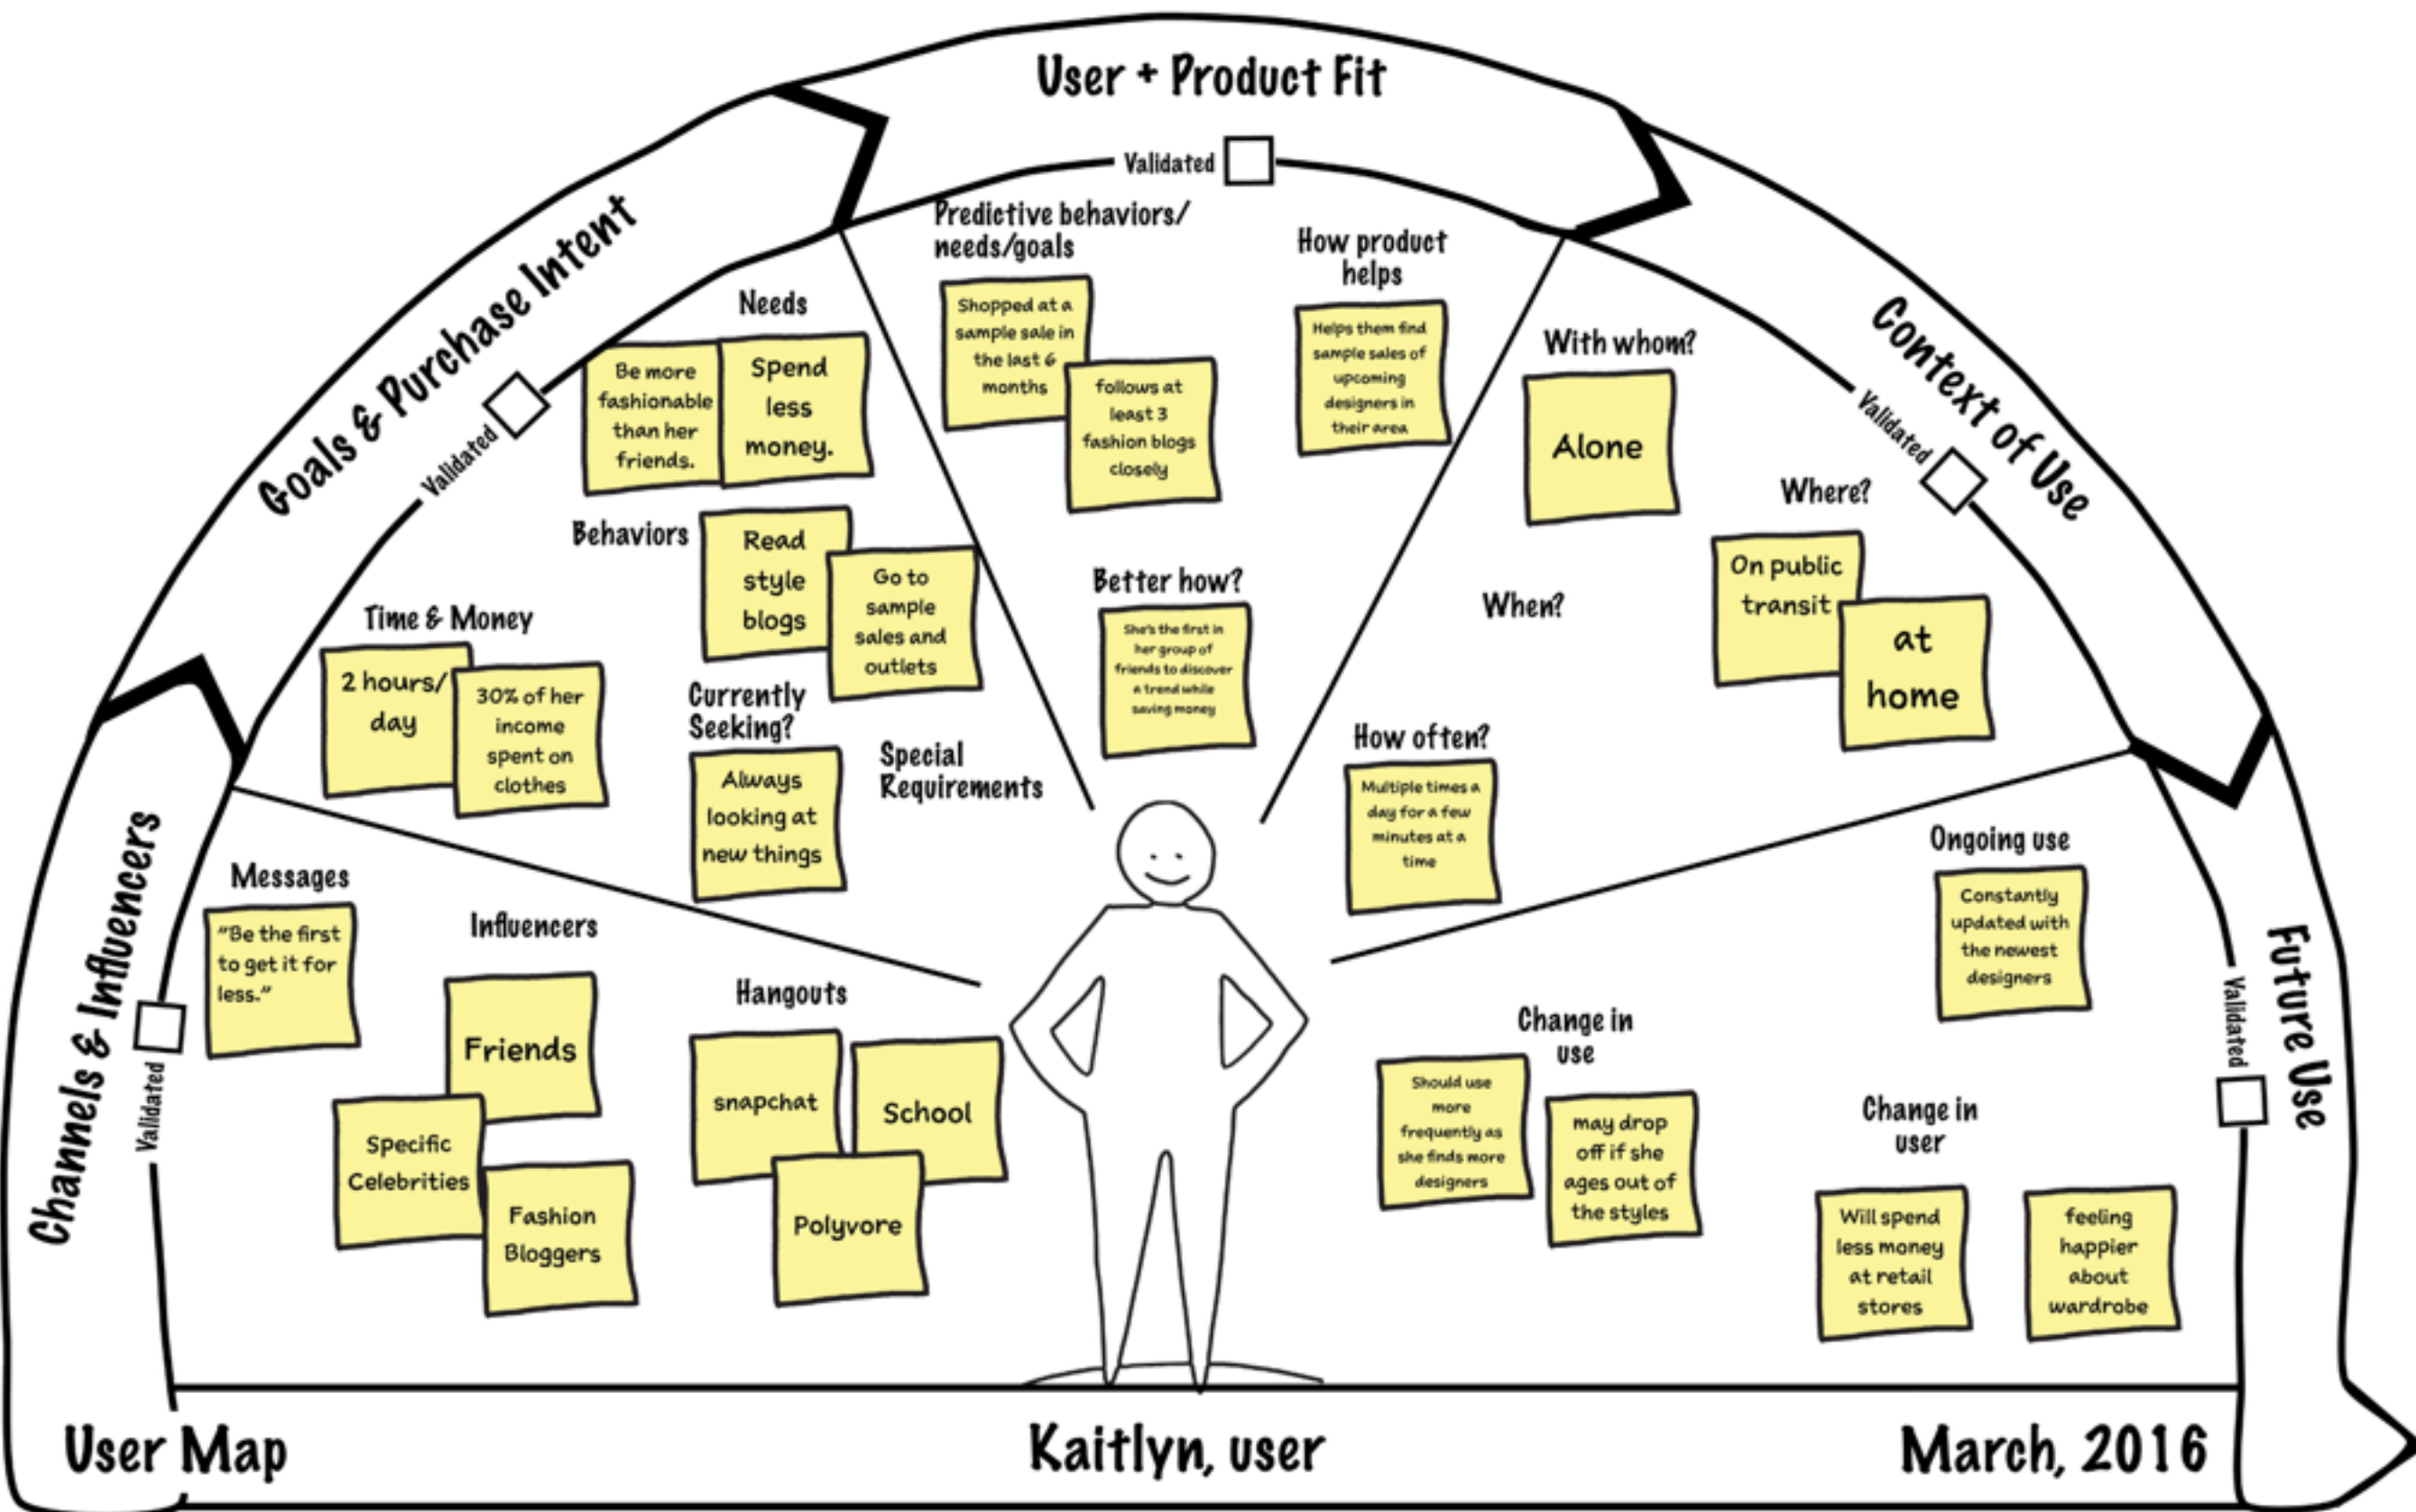

How do you know you're right?

A large, glowing crystal ball sits on a brown, cylindrical stand. The crystal ball is translucent with a bright white highlight at the top, giving it a three-dimensional appearance. Inside the ball, the words "The Future!" are written in a bold, dark, serif font. The background is a smooth gradient from a light blue at the top to a white at the bottom where the stand sits.

The Future!
